

CERTIFICATION

BS EN ISO 14001:2015 Environmental Audit

BS EN ISO 14001:2015 is the world's most recognized standard used to assess the status of an organization's environmental management system against defined requirements.

BS EN ISO 14001:2015 is the world's most recognized standard used to assess the status of an organization's environmental management system against defined requirements.

What is it?

Accreditation of an organizations environmental management systems (EMS) against the recognized International standard for an EMS.

Who is it for

Organization's within any sector (of any size) who require certification by external body of their EMS to the recognized international standard.

The ISO 14001:2015 standard can be applied to any business (regardless of size or complexity) and has been designed to take a proactive approach to managing environmental issues and improving performance.

Why the audit is right for your organization

- Improved management of environmental risk
- Reduces waste, energy, water and other raw material use
- Reduced emission and discharges
- Competitive edge in tender applications
- Engages stakeholders and can attract ethical investment
- Improve corporate responsibility and promote sustainability
- External recognition of EMS to the recognized international standard
- Demonstration to stakeholders and other interested parties (including regulatory bodies) of commitment toward environmental management and responsibility

Prerequisites

None.

The audit at a glance

Assessment of systems and operational effectiveness of EMS to a recognized standard.

How does it work?

- On site review of relevant documentation
- Interviews / discussions with relevant stakeholders
- Operational sampling
- The audit can be carried out in two stages (see below) or alternatively in a "one off" initial compliance audit visit

Stage one audit: This is primarily a document review of the environmental management system to ensure the requirements of the standard are in place. Dependent upon the outcome of this stage, the auditor will recommend and agree the schedule and date for the stage two audit.

Stage two audit: This will involve a review and completion of any non-conformances identified within the stage one process, together with a sampling of effective implementation of the systems in accordance with the ISO 14001:2015 standard.

What your organization will receive from the audit

- Summary report
- Certification to standard

Why choose us?

Our audit and consultancy services are internationally recognized and are the best way to ensure your wellbeing systems (and associated arrangements) are suitable for your business requirements, promote continual improvement and are effectively implemented.

As part of our own quality control processes, we ensure:

- Our audit and consultancy products are regularly reviewed to meet customer needs, expectations and sector best practice
- Consistently high standards of service are achieved through a robust quality assurance process including auditor standardization, training and performance monitoring
- Our technical specialists serve on strategic committees for occupational health, safety, environmental and wellbeing standards
- We have a unique internationally recognized best practice (Five Star) audit process
- Industry recognition from awards such as the prestigious Shield, Sword or Globe of Honour.
